MOKHAMMAD ILHAM PUTRA WIJAYA

mokhamm20@gmail.com | Malang City, East Java, Indonesia | LinkedIn: linkedin.com/in/hamm-ez

PROFESSIONAL SUMMARY

Fifth-semester D4 Informatics Engineering student at Malang State Polytechnic, and a graduate of the Dicoding Asah and CodingCamp programs (specializing as a Machine Learning & AI Engineer). Have a deep interest and competence in data processing, exploratory analysis, data pipeline design, and Machine Learning and AI model development. Proficient in using Python and JavaScript to build efficient and reliable back-end systems and data infrastructure. Have a strong commitment to continuous professional development and are ready to contribute through a data-driven approach to support decision-making and technological innovation in the professional work environment.

EDUCATION

Informatics Engineering (D4) Aug 2024 - Present
Malang State Polytechnic

PROJECTS

Predictive Maintenance Copilot

This is a capstone project from a bootcamp at Asah, led by Dicoding. The project involves developing a comprehensive solution designed to monitor, analyze, and predict equipment failures before they occur. The solution utilizes machine learning models trained on sensor data to identify patterns indicative of potential malfunctions, thereby enabling proactive maintenance scheduling.

Monitor Water Quality Detect Anomalies Earlier

This is the final project for a bootcamp organized by Coding Camp, powered by the DBS Foundation. The platform monitors water quality in estuarine zones in real-time by transforming historical data into a dynamic stream of information. It is designed for the early detection of ecological crises and for testing anomaly detection models, all without the need for physical hardware.

EXPERIENCE

AI Engineer Cohort Feb 2026 – Jun 2026
Coding Camp powered by DBS Foundation

National Certified Independent Study organized by Dicoding powered by DBS Foundation. I completed an intensive 6-month curriculum focused on the application of artificial intelligence (AI) and machine learning. During the program, I utilized Python to process and analyze datasets and built robust data pipelines. Furthermore, I applied AI and machine learning algorithms to solve challenges based on real-world industry case studies.

Machine Learning Cohort Aug 2025 - Jan 2026
Asah led by Dicoding

Certified Independent Study organized by Dicoding in association with Accenture. This 6-month intensive program focused on the application of artificial intelligence (AI) and machine learning. I utilized Python to process and prepare datasets, as well as to perform predictive modeling and analysis. Furthermore, using real-world industry case studies, I built, trained, and evaluated machine learning models.

Mentor - Informatics Research Workshop Sep 2025 - Jun 2026
Workshop Riset Informatika, Malang City

Actively guide mentees in understanding the fundamental concepts of informatics and programming. Deliver instruction on Java and Object-Oriented Programming (OOP) to help them navigate academic challenges. Provide training in backend development, covering an introduction to PHP, MySQL, and the implementation of CRUD operations. Share practical tips and tricks to enhance programming logic, analytical thinking, and problem-solving skills.

SKILLS

- Data Analysis & Processing: Data Cleaning, Data Preprocessing, Feature Engineering, Exploratory Data Analysis (EDA)
- Database & SQL: Data Queries (SELECT, JOIN, Subquery, Aggregation), Data Manipulation (CRUD), Relational Database Design (ERD, Normalization), PostgreSQL, MySQL
- Machine Learning: Unsupervised Learning (Clustering), Model Evaluation, Natural Language Processing (NLP), Sentiment Analysis
- Generative AI & AI Engineering: Generative AI, Generative AI for Web Developers

- Soft Skills: Digital Savvy, Good Communicator, Creative & Analytical Thinker, Problem-Solving, Mentoring, Team Collaboration
